

Shipwaste reception facilities

Drammen havn

Port of Drammen

Welcome to a green waste-solution

Drammen
havn

As from June 2005, Port of Drammen have established reception stations for ships waste. All stations are designed according to EU-directive and the Norwegian pollution-law, chapter 20

All merchant- and passenger vessels can deliver ship waste ashore. This folder gives you information how to use the waste reception facilities in Port of Drammen.

Reception Facilities.

Port of Drammen offers 3 waste reception station on our wharfs. Waste fractions listed as "No Special Fee", can be delivered to the self service stations on the wharf.

Sludge and oily waste, Grey and Black water, and Cargorecidues are not included in the reception-system. This have to be ordered by agent or vessel, and a separate invoice is generated. This can be ordered by calling ONYX, TLF +47 09600, 24 hrs.

Reporting

All vessels must report to the port authority the intended amount of garbage to be delivered. This must be specified on the form called "Garbage report to Drammen Port Authority". This form, and further information, can be downloaded from www.drammenhavn.no, or call Port of Drammen TLF +47 32208650

All vessels must pay

The waste reception facilities are self-financing. Port of Drammen does not profit to this service. All vessels must pay a waste fee, even if they don't deliver any waste

Garbage fee

The "No special fee" shall cover the costs to handle ordinary waste fractions, as listed under the description in the waste reception facilities. It is therefore important to separate the fractions.

Cruise- and pass. vessels and military vessels:
NOK 5,00 pr. Passenger

All other vessels:
NOK 0,10 pr. BT, max 500 NOK
All prices are exclusive VAT

Extra fee

The Drammen Port Authority can claim a higher fee if the vessel delivers an unusual large amount of garbage related to the vessels BT and last port of call. Extra fee can also be claimed if the vessel does not report the intended amount of garbage as described in § 20-7

Sludge and oily waste, Grey and Black water, and Cargorecidues are not included in the reception-system. This have to be ordered by agent or vessel, and a separate invoice is generated from the operator.

Exceptions

Port of Drammen can reduce the fee, or give a complete exception if the vessel is in a regular trade, and have a documented agreement with another port. A description of the ships waste system must also be documented.

How to do it right

Drammen
havn

Port of Drammen have established self-service stations for reception of ship waste. Below is listed the various fractions that can be received. To avoid increase of the fee, it important to use the waste reception stations
